

Tribute to LG

24th June 2021

OVERVIEW

Make a webpage writing about LG. On the top of the webpage, add the image and name of the company and its details below that give layout for the rest of the details such as the most famous LG phone, List of innovation etc. You can use paragraphs, links, images with CSS to give it a decent look. Add a suitable background color and font style on your webpage. Most of the parts you can make using HTML but to give it a better look using a bit of CSS and a tiny glimpse of JS

Information that should be Included:

The content of this webpage should typically include text, pictures, videos, animated GIFs etc. The landing page should typically include a well polished LG phone image(preferably the last phone that was released)and you can come up with a separate webpage that has all the information about their most sold phone and also why LG left the mobile market

Why LG left the Mobile/Smartphone Market:

innovation.creation.

The reason why LG decides to quit is they faced Loss over several billion dollars in Mobile department. There are many reasons for loss

- 1. Pricing(they are not pricing competitively)**
- 2. Innovation (am not saying they are bad at innovation , they are actually super excellent but they are innovating something for each and every mobile and not considering the innovation of previous Mobile, so developers also can't work well for that single Mobile)**
- 3. Updates (updates are usually slow from there track records)**
- 4. Naming (There is a big confusion in naming smartphone nowadays and LG is first of all , they will just name their smartphone with unusual order and very rare name which people can easily forget).**

Tags to Remember

Keep `<meta charset="utf-8">`

`<title>` is mandatory

`<p>` tag is mandatory

`<quote>` is mandatory

`` is mandatory

`<a>` is mandatory

CSS part-Although design is subjective we recommend using some tags

`<background color>`

`<margin>`

`<text styles>`

innovation.creation.

<wrap>

<hover>
